

Taking quality to new heights with **5** years guarantee*

- Optimally designed to withstand the toughest environments (coil architecture, electrical distances).
- Perfect control of the industrial process (statistical process control, FMEA for critical processes).
- Strict quality control (optimal traceability, supervision plans).
- Expert appraisal of installation and commissioning conditions (protection solutions for all types of installation).
- The ideal solution for optimal safety and better environmental protection (E2, C2, F1).

Trihal⁵, more than a guarantee, a commitment on quality.

From 160kVA to 15MVA,
up to 36kV.
More than 60 000 transformers
installed all over the world.

* On completion and validation
of the commissioning check
list, and after expert appraisal
and approval.
