

How to have the advantage of the Trihal 5-year guarantee

Since the 1st July 2006, all dry type cast resin Trihal transformers can get a 5-year guarantee

For that, a procedure has to be respected :

1. All the instructions contained in the installation, commissioning and maintenance leaflet must be followed
2. The Check-list before commissioning (delivered on the transformer or the informatic file.xls) must be imperatively completed and include :
 - the transformer's serial number, which can be found on the rating plate,
 - an answer to each point (either « yes », or « NA » if not applicable),
 - the insulation resistance measurement results, which must be equal to or greater than the limits given in the installation, commissioning and maintenance instructions,
 - the date on which the 27 points inspection was carried out,
 - signed by the inspector and his manager,
 - the effective commissioning date, which must be no more than 7 days after the inspection date.
 - the definitive installation place of the transformer
 - and your contact information
3. The Check-list before commissioning must be returned to France Transfo (by mail or e-mail), within 15 days of the effective commissioning date

After receiving this Check-list, France Transfo controls and validates it, and sends you a mail attesting the 5-year guarantee attribution
